

HEAD LICE OPTION for using IVERMECTIN

Sklice (Ivermectin) is an approved product to treat human head lice. This shampoo is very effective for head lice, even the resistant head lice. The biggest down side is that the product can cost more than \$100.00.

The active ingredient, Ivermectin, is commonly used for horses. It costs less than \$10.00.

If you would like us to call in SKLICE, we can do that. If you chose to use this method, these are the instructions.

Use the paste for a 250 pound horse (it is marked on the syringe), mix with conditioner. Use about 4 times the amount of conditioner as the Ivermectin. Apply just like Sklice. Apply ALL OVER the scalp, leave on for 15 minutes, and rinse out.

This is off label and has not been tested on humans. But, people with horses get this all over their own hands and arms while treating horses and there are no safety warnings.

See below for some local places that sell IVERMECTIN for Horses. You can also buy it on line at several distributors, including Valley Vet.

Dover Saddlery	North, 1041 MD-3	(410) 451-2174
